To whom it may Concern;

Instead of investigating police chief Gil Hill you should be going through 1300 Beaubien and investigating your homicide Squads. Especially squad 4 where you have Sgt. D. Monttiff in charge. During her interrogation she uses any means to get a confession telling suspects they are being questioned as a witness only to find out later she has told them what to say and has charged them with the crime also.

I have heard not only in this case that is a personal one to me but in others how she has lied and been caught up in these lies in court. Sgt. D. Monttiff displays a strong sense of prejudice against young black males.

If more people who have had dealings with her would come forward you would either get her to change or dismiss her from her duties, even being a suspect you should have rights and be treated like you are a human being. The statement you are innocent until proven guilty means nothing to Sgt. D. Monttiff, you are guilty until (over)

proven innocent in her eyesight and 9 times out of 10 guilty is what you are when she's on the case.

Don't stop at cleaning up the department heads go to the precincts and clean up some of the dirty Police officers you have in there. 14 years as an officer don't mean you've been doing a good job it means someone has just over looked what you've been doing and said the hell with the public.

Once again were talking about another form of Police brutality.
